Atlas of the Urban World

Author: Éric Verdeil (Text)

Publisher : Presses de Sciences Po

Category : Humanities and Non-Fiction

Genres : Geography/Demography - Political Sciences - Sociology - Ecology - Reference

Keywords : Urbanization

An atlas of the many facets of urban worlds of today... and tomorrow!

Seven out of every ten humans on earth live in a city. What realities does this accelerated urbanization conceal? Gigantic megalopolises are growing, rural areas vanishing, the built world both sprawling and soaring skyward all at once, new forms of segregation and inequality emerging, etc. A major symptom of our entrance into the Anthropocene Era, the spread of urban areas contributes to global warming, destroys biodiversity, and leaves us highly vulnerable to climate change.
