Understanding and mastering algorithms, the strange programs that surround us!

Artificial intelligence is no longer something out of a sci-fi film. Algorithms manage assembly lines, analyze computer data, give advice, and make predictions. They help us, inspire us, guide us, watch us, and sometimes even manipulate us. What will man's place be in an alldigital society? Complete with debates, profiles (Bill Gates, Steve Jobs, Mark Zuckerberg...), interviews with experts (scientists, computer engineers, philosophers...) and interesting information (figures, key facts) for a clear and in-depth analysis!
