

Demystifying Virtual Reality

Authors: Indira Thouvenin - Romain Lelong

Publisher : Eyrolles

Category : Science, Technology, Medicine

Genres : Computer Science

Keywords : Fidelity - Pregnancy - Squid

A mainstream book about a rising phenomenon.

This book demystifies and provides a complete overview of today's virtual reality: history, functions, equipment, and applications for both individuals and professionals, their perspectives and dangers. Richly illustrated, fascinating, clear, and easy to read, it takes the reader into the wonderful world of virtual reality, and stands out from the competition, whose books on the subject tend to be very austere and boring. We discuss avatars, virtual cats to pet, perception, immersion, artificial intelligence, philosophy, ethics...
