---

An investigation into the vagaries of the natural medicine and well-being industries.

This book explores a taboo subject: the vagaries of the natural or alternative medicine industry. It offers concrete proposals to fight the crises that have resulted as the industry strays from its proclaimed intentions, seizing upon new methods endemic to our modern world. Georges Fenech is an expert investigative reporter with a great deal of experience in protecting minors and vulnerable populations in the domains of healthcare and social phenomena, including sects.
