Water: A Precious Resource

Authors: David Blanchon (Text) - Sylvia Lorrain (Illustrations) - Vincent Lozouet (Illustrations)

Publisher : Hachette Enfants

Category : Children's Books

Genres : Non-Fiction Children's Books

Keywords : Water - Earth - Environment

Safeguarding the planet and its resources has high stakes for generations to come. This series warns and teaches children without alarming them.

This book documents and explains everything you need to know about THE most important resource for life as we know it: water. It covers water's first appearance and how it's distributed on our planet, as well as our different uses for it, explaining the water cycle, how water is made drinkable, and what we mean by waste water. By learning about this vital but ultimately finite resource, we also put forth a message of hope. Children will discover the steps needed to consume water responsibly today to avoid conflicts with regards to its usage in the future. They'll also find solutions that already exist to consume water better... or less of it!
