Climb aboard for an extraordinary journey to conquer new areas of research.

Predict tsunamis? Plunge into ocean ravines to find life in extreme conditions? Trace what influences currents? Understand and regulate fishing? This book of animals features stories big and small.

Oceans cover 71% of the earth's surface. They are home to an incredible array of creatures and play a major part in regulating planetary systems. But they are in danger. How can we take advantage of their resources without exploiting them? Embark on an odyssey of discovery with this book, from flora and fauna to sustainable fishing and saving coastal ecosystems.
