A fresh angle – poop! – provides a fascinating introduction to the world of animals.

Whether they dwell on land, sea, or air, whether covered in fur, feathers, or scales, all animals, big and small, have something in common: poop! Pee and poop are subjects often avoided, yet far from being disgusting, poops are treasures from nature and can tell us a lot about the animal world. Animals use it to communicate, hide, and defend themselves and their young. An illustrated non-fiction book of everything there is to know about poop, with interactive elements (flaps, laser die-cuts).
