They're very real, and struggling to save their species!

They are invincible, indefatigable, seductive, tough... some seem to come from another world!

Superheroes are everywhere, fighting to keep their place in the cycle of life. From flying snakes to gifted mushrooms, killer toads to immortal jellyfish, nearly a hundred species are presented in this striking showcase. Their feats, genius, and extraordinary abilities make them superheroes of our planet.

Our planet's glorious biodiversity is passionately explored in exceptional photos and well-researched text by an author specializing in the natural sciences.

This book proves that superheroes have been with us for millennia.
