## Biodiversity: Do It Yourself!

50 Ways to Nurture Biodiversity

---

Author: Caroline Caroline Burzynski-Delloye

Publisher : Alternatives

Category : Practical Books

Genres : Sustainable Lifestyle

Keywords : Biodiversity

---

A simple visual manifesto promoting biodiversity, with stylish sketches of budget- and environmentally friendly advice anyone can follow.

A book for understanding how biodiversity works, why it's not working, and how to do your part in fixing it. This colossal issue can also be addressed by small, individual actions, and it's not so hard to make a start! Activities to help biodiversity reclaim its own, cultivate it, garden while preserving it, enjoy it, and learn more about it. Activities to help us grasp the stakes in play when our actions re multiplied. Activities that have been tested, experimented with, adopted or improved, invented by gardeners of all sorts who have contributed to this compilation. Another way to approach biodiversity: with happiness!
