Meet 40 environmental activists who, through their writings and their struggles, have contributed to raising awareness about our planetary crisis.

Writers, philosophers, geographers, scientists, community activists, politicians: from the industrial revolution to the present day, these 40 individuals have fought for climate justice and the preservation of nature.

Through their writings and actions, they help us understand global warming, the collapse of biodiversity, the pollution of the oceans, air and soil, and all the mechanisms that contribute to raising awareness about our environmental crisis.
