World Without End

Climate Shifts and Energy Miracles

Authors: Jean-Marc Jancovici (Script writer) - Christophe Blain (Author/Drawings)

Publisher : Dargaud

Category : Comic Books and Graphic Novels

Genres : Graphic Novels - Non-Fiction

Keywords : Energy - Environment - Sustainability - Sustainable city - Free verse

With humor and intelligence, this work addresses the fundamental energy and climate challenges we face in the near future.

The culmination of a meeting between a major comic creator and a renowned energy and climate specialist, this project is undeniably necessary. Smart, concise, and funny, the comic discusses the profound changes our planet is undergoing, our dependence on fossil fuel and other non-renewable energy sources, and the consequences that are already apparent for human life on the planet.

Although Jean-Marc Jancovici focuses on energy issues and climate change, he doesn't ignore social, ecological and economic implications (could the pursuit of economic growth at any price be a delusion?). Christophe Blain, playing the role of a Candide, provides the lavish, surprising, and always instructive art.
