Two polar bears spend their days happily on an ice floe. But one morning, they wake up to find the ice... all gone!

Dubhe and Merak, two polar bears, are living a happy life on their ice floe. But one morning, they wake to find the ice is all gone! Split up, they try to survive in the hostile environment of the sea, confronting its many dangers. This is a story of two hearts meant to beat as one, an adventure from beyond the seas.

The striking illustrations—woodcuts and screen prints—invited readers to plunge into a universe in delicate shades of blue, green, and grey. With unmatched standards of reproduction (thanks to multichrome printing) and endpapers that resemble frozen snow, *The Divergence of Icebergs* is at once a picture book and an object for art lovers.
