"A precise, unique, and humble analysis of events from the past 30 years in France and abroad: President Trump, the pandemic. An important book for today, a crucial understanding of recent history."

Jacques Rancière, one of the most widely-read radical thinkers in aesthetics, philosophy, and political theory, is a man of few words when it comes to current affairs. Principled and wise, he never tells people in the street what to do. He is, however, a sharp critic of dominant, shallow attitudes about equality and democracy. In this book, he speaks out on the last 30 years, lambasting the rise of oligarchic governance, anti-immigrant laws, and neoliberal "reforms." He also shows how new forms of protest (*indignados*, *Gilets Jaunes*, *Nuit debout*) should transform our understanding of people's autonomy and resist both populist and anti-populist temptations in our so-called "post-truth" age.
