A Trip Through Space-Time

From the Theory of Relativity to the Mysteries of the Cosmos

Authors: Stéphane d'Ascoli - Arthur Touati

Publisher : First

Category : Science, Technology, Medicine

Genres : Physics/Chemistry/Biology

Keywords : Relativity - Theory - Digital - Intestine - Ghost

A thrilling trip through the theory of relativity, from non-Euclidean geometry to particle physics.

Looking up at the sky and counting the stars, watching plants grow or a waterfall in motion... all these moments of wonder probably remind you of your childhood. But how do we explain all these phenomena that we witness daily? The question of falling bodies is the beginning of one of the greatest human and scientific adventures: relativity. It's the story that this book will tell you, taking you on a voyage of discovery bound only by the cosmos itself!
