

Artificial Intelligence

Authors: Julie Lardon (Text) - Agathe Robinson (Illustrations)

Publisher : La poule qui pond

Category : Children's Books

Genres : Non-Fiction Children's Books

Keywords : Suburb - Technology - Artificial intelligence - Machine - Immigrant

This illustrated work on artificial intelligence completes a series depicting the major issues of our young century.

The "Future Worlds" series hews to simple and accessible writing for children and a decided taste for illustrations, given pride of place throughout our books. This volume is divided into several chapters covering topics from the birth of machines to our current society which, it would seem, can no longer live without them. Along the way, it raises questions: are machines smarter than humans? Can artificial intelligence replace humans? Hasn't it already? So many questions find answers in this book!
