A book about resiliency, hope, and finding peace.

One September day, a young man loses his job. He thinks his life is over. But he's wrong: another life is just beginning. A life that involves a cat wearing a tuxedo and a rodent who dreams of a better life. Not to mention a follower with 30 million friends, a mystery man playing with fire, and his brother, a poster child for morons. *The Walk of Fire* is about missteps. Career missteps, GPS missteps, mistakes we make when we think there's no more life worth living. Those days when we wonder what in God's name we've done, those days when we could have said "No" but for some odd reason, said "Yes" instead, and fate smiled on us.
