### Alexis Faja, Publisher

"Not merely flowery, but informational! Gaëtane shows you how to capture movement, atmosphere, emotion. When I saw this sensitive book, I just had to publish it!"

This book is an invitation to go out and gaze at wildflowers.

Poppy, plantain, elder, chamomile, eglantine—all the wildflowers we see in our yards or on strolls and pay no mind to, although their diaphanous petals and discreet tints are subjects of inexhaustible richness for a watercolorist.

In addition to detailing watercoloring techniques, Gaëtane guides readers through an original creative process in which observation and interpretation loom large in helping you develop your own style. Simple, specific tips to sharpen your perception as a watercolorist and recipes for enjoying nature's bounty.
