"With its elegant, bold visual design, this title promises a rich reading experience. Editors' favorite at the Bologna Children's Book Fair, 2023."

This title breathes fresh life into the picture book genre. Designed entirely as shadow puppets (except for the last two-page spread), it offers more than 300 images to observe, decipher, comment on, and experience. Its strength lies in a sensory approach that encourages young readers to perceive the richness of the world around him using all five of their senses.
