Borders define countries. On a map, everything looks clear and well-ordered. But the reality is quite different!

Telling the story of borders is an original way of telling the story of the world we live in. This one-of-a-kind nonfictional work retraces the surprising aspects of borders: their history, but also their cultural and social importance. To some, crossing them is a matter of life and death; for others, it is merely vacation. Borders are also places of encounter and sometimes eccentricities: enclaves, anomalous time zones, meetings of three countries (or more!)...

The text alternates between information and closer looks that provide detail or touches of humor. Perfect for readers of all ages in search of facts and entertainment!
