A French business that benefited from Covid, a Libyan militia, a dictatorship's hacker, and a Russian oligarch's front: what do they have in common?

The authors demonstrate how worldwide crises become lucrative opportunities for certain unscrupulous individuals and organizations, exploring how conflicts, natural disasters, and socio-political turmoil are exploited by economic players, traffickers, and political entities for their own benefit. This book highlights the mechanisms behind global destabilization and unveils the complex ramifications of these practices on vulnerable populations.
