Category : Humanities and Non-Fiction

Genres : Essay

Keywords : Health - Pharmaceuticals - Care

---

Understanding the works of pharmaceutical industry.

This book describes the workings of the drug supply chain, an issue that has been taken out of the hands of citizens and public authorities. Starting with an examination of the opacity surrounding the topic, Pauline Londeix puts her meticulous yet accessible expertise to work in helping us understand the structural flaws of our pharmaceutical policies. Her work takes its place in a collective reappropriation of drug policies, formulating pragmatic proposals in service of a simple and vital objective: ensuring we can all effectively exercise our right to healthcare.
