It's nice to be cuddled up with those you love while the storm rages outside.

Like humans, animals also sequester themselves, whether to escape predators, hibernate, or even grow and develop.

Rather than seeing such confinement as a source of anxiety and solitude, Pauline Kalioujny shows us a tender, positive version. Staying in means taking time out for yourself. Time to recharge, give your cozy home a makeover, or get to know the people close to you. This catalogue of cozy places will help children discover all the variations on "home" that exist out in the wild!
