---

Your first guide to exploring outer space!

Disguised as a space travel guide, this is a captivating, humorous documentary-style picture book that takes you on a journey through the planets of our galaxy and far beyond. It offers identity cards for each planet, a generous dose of adventure, and a wealth of information based on the latest scientific discoveries. It also reminds us that Earth, our home planet, remains the only one truly fit for life – and that we must protect it.
