Genres : Photography

Keywords : Nature - Portraits - Culture

Immerse yourself in 11 destinations of immense beauty, captured by renowned photographer JC Pieri, a worthy heir to Yann-Arthus Bertrand.

JC Pieri is a travel photographer with over 600.000 followers on Instagram. In this travel journal, he takes us to 11 distant and fragile lands that are increasingly threatened by modern society, and recounts how these shots were (sometimes miraculously) taken. His exceptional photographs reveal landscapes and faces that seem to speak of a forgotten world—such as those of the Kokama Yakami tribe in the heart of Brazil or of the Mentawai people, guardians of Sumatra's ancient forests. These photographs of unspoiled nature and wild animals bring them close to us without altering their mystery.
