Genres : Ethnology/Anthropology -
Geography/Demography - History

Keywords : Utopia - Atlas

"No map of the world is worth looking at if the land of utopia is not on it." – Oscar Wilde

So why not make an atlas dedicated to it? In this book of all possibilities, we institute Gross National Happiness, we work two hours a day, we reinvent life, we kill death. By crossing the limits of the imagination, this book – illustrated with old photos, plans, and maps – makes utopia a source of inspiration, a 256-page daydream.
