SUR LES VACCINS
Préface d'Alain Fischer

Everything You Wanted to Know About Vaccines (or Almost!)

Authors: Sylvie Guerder (Text) - Monique Dontenwill (Text) - Claire Marc (Illustrations)

Publisher : CNRS Éditions

Category : Science, Technology, Medicine

Genres : Medicine

Keywords : Vaccination - Pharmaceutical industry - Disease

Few scientific topics are subject to such massive misinformation and such serious consequences. Beneath its seemingly light graphic style, this book provides the necessary keys for understanding a subject that it as complex as it is essential.

How do vaccines work? What kinds of diseases do they protect us against? What do they contain? What is an RNA vaccine? What are the real risks? What is herd immunity? Why is there no vaccine for AIDS? Who are the different actors behind the development of new vaccines? Are there alternatives? Does vaccinating animals protect us?
